Streamlabs + SE
Platform Support

1-Click Install
No files needed

Fully Editable
Colors, fonts, layout

# Quick Start

**Streamlabs** | StreamElements → Page 3

STEP 1 - INSTALL

**Before installing:** Create a new Streamlabs widget theme, or back up your current widget. Installing into an existing theme can replace its Chat Box widget.

**Install to Streamlabs**

**1 Click the install button above**
Select your new, dedicated theme when Streamlabs prompts you. The widget installs automatically. No files or code needed.

**2 Customize in Custom Fields**
Open your Streamlabs dashboard, go to Chat Box, then open `Custom Fields` to adjust colors, fonts, sizes, and layout. Hit `Save Settings` when done.

**3 Copy your Widget URL**
Click `Click To Copy Widget URL` near the top of Chat Box. Keep this private URL for your OBS source.

**4 Add to OBS as a Browser Source**
In OBS (or Streamlabs Desktop), add a new `Browser Source` and paste your Widget URL. Start at 380 px wide by 520 px high, then resize for your layout.

PRO TIPS

**Cropping:** Hold ALT and drag the edges of the Browser Source in OBS to crop the visible area.

**Color accuracy:** Check Screen lavender, Header lavender, Status strip, and the text colors in Custom Fields. Save changes before testing in OBS.

**Chat cut off?** Long messages clip after six lines. Reduce font size to fit more text.

# StreamElements + Customization

Streamlabs → Page 2 | **StreamElements**

**Install to StreamElements**

▶ **Video walkthrough** youtube.com

**1** **Click the install button above**
Sign in with StreamElements on the share page, then install the overlay to your dashboard. Keep your current overlay while you set up this one.

**2** **Customize in your overlay editor**
Open My Overlays, click the widget layer, then use the left panel fields to adjust colors, fonts, and layout.

**3** **Copy overlay URL, add it in OBS**
Copy the overlay URL into an OBS `Browser Source` at 1920 x 1080. The chat layer starts at 380 x 520; position it in the overlay editor.

## CUSTOM FIELDS REFERENCE

These are the settings available in your widget's Custom Fields panel. Exact fields vary by widget. This page shows a curated sample only. More settings are available inside the full customization menu in Streamlabs and StreamElements.

# Troubleshooting & Support

COMMON ISSUES

**Widget not showing in OBS?**

Make sure the Browser Source URL is correct and dimensions are set. Try refreshing the source (right-click, then Refresh). Check that your stream is live or use a test chat message.

**Chat messages look cut off or overlapping?**

Long messages deliberately clip after six lines. Decrease Font Size to fit more text, or increase the source height to show more messages.

**Colors don't match the preview?**

Check Screen lavender, Header lavender, Status strip, and Message Text Color in the widget settings. Save your changes, then refresh the OBS browser source.

**Existing widget got overwritten?**

Installing this widget replaces the Chat Box in the selected Streamlabs theme. Choose a new theme before installing, or restore your saved Chat Box backup.

## Need Help?

If you run into any issues not covered above, reach out and we'll get you sorted.
