Streamlabs + SE
Platform Support

1-Click Install
No files needed

Fully Editable
Colors, fonts, layout

Quick Start

Streamlabs | StreamElements → Page 3

STEP 1 - INSTALL

Before installing: Create a new Streamlabs widget theme, or back up your current widget. Installing into an existing theme can replace its Chat Box widget.

Install to Streamlabs

1 **Click the install button above**
Select your new, dedicated theme when Streamlabs prompts you. The widget installs automatically. No files or code needed.

2 **Customize in Custom Fields**
In your active receipt theme, open Streamlabs `Chat Box`, then `Custom Fields` to adjust colors, fonts, sizes, and layout. Hit `Save Settings` when done.

3 **Copy your Widget URL**
In Chat Box, use `Click To Copy Widget URL`. Keep this private URL for your own browser source.

4 **Add to OBS as a Browser Source**
In OBS (or Streamlabs Desktop), add a new `Browser Source` and paste your Widget URL. Start at 420 × 620 pixels, then resize for your layout.

PRO TIPS

Cropping: Hold ALT and drag the edges of the Browser Source in OBS to crop the visible area.

Receipt colors: Background opacity 0 keeps it clear. Raise opacity to show your chosen background color. Paper color is separate.

Paper feed: Use Paper feed animation for motion. Instant and reduced-motion options are also available. Keep Streamlabs Always show messages on.

StreamElements + Customization

Streamlabs → Page 2 | StreamElements

Install to StreamElements

▶ Video walkthrough youtube.com

1 **Click the install button above**

Sign in with StreamElements on the share page, then install the overlay to your dashboard. Keep your current overlay while you set up this one.

2 **Customize in your overlay editor**

Open My Overlays, select the Custom Widget layer, then Settings. Edit the receipt and optional inline alerts, then Save. Inline alerts are StreamElements-only.

3 **Copy overlay URL, add it in OBS**

Copy your overlay URL into an OBS `Browser Source` at 1920 × 1080, matching the overlay canvas. Resize the receipt layer inside the editor.

CUSTOM FIELDS REFERENCE

These are the settings available in your widget's Custom Fields panel. Exact fields vary by widget. This page shows a curated sample only. More settings are available inside the full customization menu in Streamlabs and StreamElements.

Widget Title	BYTE & BEAN	Status Label	CONNECTED

Receipt color	#FAF3E0	Message Text Color	#30342D
Divider Color	#999B89	Background color	#000000
Message Stack Direction	FEED FROM BOTTOM	Entry Animation	PAPER FEED

Troubleshooting & Support

COMMON ISSUES

Widget not showing in OBS?

Make sure the Browser Source URL is correct and dimensions are set. Try refreshing the source (right-click, then Refresh). Send a real message in your connected Twitch chat to test; your stream can be offline.

Chat messages look cut off or overlapping?

Increase the Line Height value or decrease Font Size in Custom Fields. You can also try increasing the Browser Source height in OBS.

Colors don't match the preview?

Check Receipt color and Background opacity in the widget settings. The background starts transparent; increase opacity only if you want a visible background.

Existing widget got overwritten?

Installing this receipt replaces the Chat Box in the selected Streamlabs theme. Choose a new theme before installing, or restore your saved Chat Box backup.

Need Help?

If you run into any issues not covered above, reach out and we'll get you sorted.
