

FIREWALL RULES MONITOR CHAT WIDGET

Your stream, reimagined.

Thanks for claiming your free widget! This guide walks you through installation, customization, and getting it on stream in minutes.

WHAT'S INSIDE

- 01 One-click install — no files
- 02 Customize colors, fonts & layout
- 03 Troubleshooting & pro tips
- 04 Explore available retro stream kits

WIDGET PREVIEW

[Streamlabs](#)[StreamElements → Page 3](#)

STEP 1 - INSTALL

Before installing: Create a new Streamlabs widget theme, or back up your current widget. Installing into an existing theme can replace its Chat Box widget.

[↓ Install to Streamlabs](#)

1

Click the install button above

Select your new, dedicated theme when Streamlabs prompts you. The widget installs automatically. No files or code needed.

2

Customize in Custom Fields

Open your Streamlabs dashboard, go to Custom Widget, then open [Custom Fields](#) to adjust colors, fonts, sizes, and layout. Hit [Save Settings](#) when done.

3

Copy your Widget URL

Click the [Link](#) icon in the top-right corner of the Streamlabs widget editor to copy the URL to your clipboard.

4

Add to OBS as a Browser Source

In OBS (or Streamlabs Desktop), add a new [Browser Source](#) and paste your Widget URL. Set the width and height to match your layout.

PRO TIPS

Cropping: Hold ALT and drag the edges of the Browser Source in OBS to crop the visible area.

Color accuracy: Right-click Browser Source, then Properties, then Blending Method, then set SRGB Off

Chat cut off? Increase line height or reduce font size in Custom Fields.

StreamElements

 Install to StreamElements

 Video walkthrough youtube.com

- 1

Click the install button above

Sign in with StreamElements on the share page, then install the overlay to your dashboard. Keep your current overlay while you set up this one.
- 2

Customize in your overlay editor

Open My Overlays, click the widget layer, then use the left panel fields to adjust colors, fonts, and layout.
- 3

Copy overlay URL, add it in OBS

Copy the overlay URL, add a [Browser Source](#) in OBS, paste it in, then set the width and height to match your layout.

CUSTOM FIELDS REFERENCE

These are the settings available in your widget's Custom Fields panel. Exact fields vary by widget. This page shows a curated sample only. More settings are available inside the full customization menu in Streamlabs and StreamElements.

Block chip color	#F97316	Status LED color	#22C55E
Font family	IBM PLEX MONO	Message stack direction	PICK OPTION
Entry animation	SLIDE FROM RIGHT	Smooth scroll	YES

COMMON ISSUES

Widget not showing in OBS?

Make sure the Browser Source URL is correct and dimensions are set. Try refreshing the source (right-click, then Refresh). Check that your stream is live or use a test chat message.

Chat messages look cut off or overlapping?

Increase the Line Height value or decrease Font Size in Custom Fields. You can also try increasing the Browser Source height in OBS.

Colors don't match the preview?

In OBS, right-click the Browser Source, go to Properties, and set Blending Method to SRGB Off. This prevents OBS from altering your widget's color output.

Existing widget got overwritten?

Streamlabs only supports one custom widget per theme. Create a new theme before installing, or back up your current widget's code first.
